ZetRing PISTON

FOR THE NEW DRIVING WORLD

TKRJ realizes sensational debut of latest piston! Maximum performance of the engine !
Piston with lightness, much more strength, high endurance for the heat !

TKRJ's outstanding technology succeeds in ZR piston (Zetring) is much higher with respect to strength & qualification than current main type of piston by gravity-casting. Daily driving in town, in racing, in speeding scene, ZR piston realizes in leading maximum performance.

ZR piston presents the New Driving World (Field) with obtaining maximum performance for your motorcycle engine.

the features of ZR piston

outstanding durability 2~3 times than gravity-cast

TKRJ realizes high durable piston with minute & totally averaged organization of piston by TKRJ's characteristic technology 'no splattered hole dycast way system'. Endurability, resist for friction are 2~3 times (*) higher than current gravity cast products. This can make long time stable driving use for your motorcycle without high possibility of breakage, break-down.

*according to our inspection data / actual figure can be different depending on the condition of use.

Lightness & high resist for heat smooth driving in high speed use

Main Material of ZR piston is special silicon-alloy that TKRJ newly develops. With excellent lightness and small heat-swamping rate can make ZR piston less ratio of seize-up. In the circumstances of high RPM, would assist smooth driving of yours.

By ZR piston, we can pursuit maximum speed & performance even under severe condition of racing.

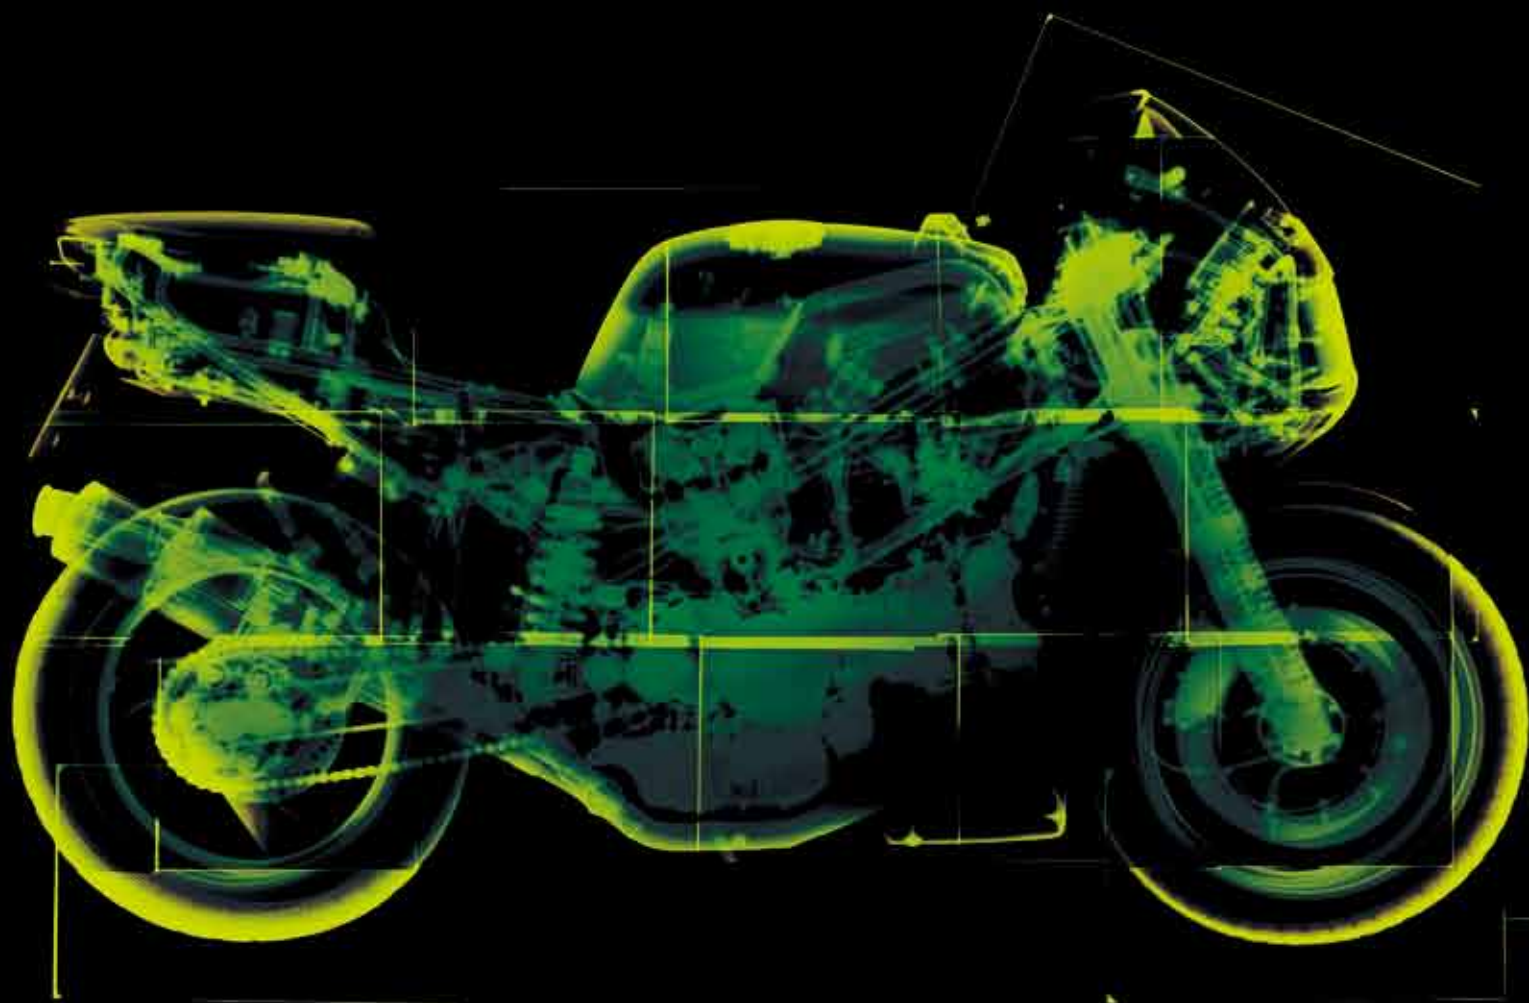

High qualified, trustable quality with Surprised performance even mass production

'no splattered hole dycast way system' has less possibility of unstable quality products in producing.

Process by TKRJ 's original way of this achieves outstanding productivity.

ZR piston presents same level of special racing piston by way of mass production.

It means , TKRJ ZR piston is more valuable than the common sense for high performance piston so far in the meaning of cost performance!
